LIQ1 – Liquidity Coverage Ratio (LCR)

Introduction

The Liquidity Coverage Ratio (LCR) is a minimum standard set by Basel III, to promote short-term resilience of a bank's liquidity risk profile by ensuring that it has sufficient High Quality Liquid Assets (HQLA) to overcome total expected cash outflows minus total expected cash inflows as per SAMA / Basel specified stress scenarios for the subsequent 30 calendar days.

The LCR report for SAIB is prepared in accordance with the public/ market disclosure requirements and guidelines with respect to the Liquidity Coverage Ratio Disclosure Standards as published by the Saudi Arabian Monetary Authority (SAMA) in August 2014. The purpose of this document is to disclose both qualitative and quantitative information regarding The Saudi Investment Bank's (SAIB or the Bank) liquidity position, LCR results and internal liquidity risk measurement and management processes.

Governance Framework and Liquidity Management

The Bank's Board of Directors has the overall responsibility for liquidity risk management by ensuring that the Bank's risk exposures are maintained at or above the minimum levels. To this end, it has established an appropriate liquidity risk management framework for the management of the Bank's funding and liquidity management requirements. Further, the Bank maintains a Contingency Funding Plan (CFP) which identifies a diversified set of readily available and deployable potential Contingency Funding (CF) resources under crisis situations.

Senior Management monitors the information on the Bank's liquidity needs and market developments on a daily basis, and the Asset Liability Committee ALCO reviews the results on a monthly basis. The management of the Bank's liquidity management is further delegated to the Treasury group to ensure the Bank's liquidity positions are maintained according to the policy and laid down limits. The Bank seeks to hold sufficient unencumbered high quality liquid assets to ensure compliance with the minimum LCR requirements and has set internal triggers to provide timely escalation to ensure mitigating actions are taken.

Qualitative Disclosures for LCR as of March 31 2026

The 90 days' average LCR (as provided on the next page) has increased from 185.34% as of December 31 2025 to 190.78% as of March 31 2026.

The total cash outflows increased from SAR 22.59 billion to SAR 22.84 billion from previous quarter, and the inflows decreased from SAR 10.64 billion to SAR 10.54 billion. While the HQLAs increased, from SAR 22.14 billion to SAR 23.47 billion which led to a net increase in LCR by 5.44% still the final LCR was maintained well above regulatory minimum requirement of 100%.
